

Meldrim Community Service Program

Description

The Meldrim Community Service Program is a program to benefit seniors and individuals with disabilities in the Meldrim Community that are in need of assistance. This program is possible with the cooperation and approval of the Effingham County State Court and the Effingham County Probation Office. I approached them with the idea to help seniors and individuals within Meldrim that are in need, while giving them another outlet for individuals that are required to perform community service. Not only does this help the Meldrim Community, it also helps Effingham County. Please read the following information and let Stephen Newsome know if you would like to help in any way or if you know of someone that may qualify for assistance.

Qualification Requirements:

- **Must be a senior citizen or individual with disabilities in the Meldrim Community physically unable to perform strenuous chores around the home and that are financially unable to hire someone.**

Scheduling of Work

- Work will be scheduled by the availability of individuals able to perform various services.
- The availability of someone to help will fluctuate and at times there may not be someone available.
- Someone on the bottom of the list may actually receive services first if their needs match the experience of a new community service person.
- In consideration of the possible irregularity in regard to available community service personnel, things will be done in as timely manner as possible.

Liability

- **All individuals performing community service are required to sign a release of liability** for Effingham County, The Meldrim Civic Club and all of it's officers and members, as well as the owners and residents of any property upon which they are performing work.
- All individuals performing community service will be supervised and **ARE NOT ALLOWED** in the homes of those in which they are performing work for.
